Executive Summary

Experienced iOS Developer with over 4 years of expertise creating applications focus in reliable and seamless experience. Skilled at transforming designs into functional apps. Passionate about discussing ideas, brainstorming, and making an impact.

Relevant Experience

Full-Stack Developer • planetmoto.com

Jan 2024 - Dec 2024

- Developed and maintained a content management system (CMS) for operational use, leveraging PHP Laravel to streamline internal workflows.
- Redesigned and implemented the dealer page, along with new modules for vehicle reconditioning and listing management.
- Designed and developed API endpoints, defining parameters and responses to support integration between the website, CMS, and Android applications.
- Created and managed databases using SQL, ensuring data integrity, and scalability for various system components.

iOS Developer • planetmoto.com

Jan 2023 - Dec 2023

- Designed, developed, and launched a platform for buying and selling used motorcycles, building the application from the ground up using MVVM architecture and Combine framework.
- Work alongside with product managers, project managers, and designers to ensure rapid development and deployment, meeting tight deadlines without compromising quality.

iOS Developer Lead Trainee • Tectagon IT Consultant

Jul 2021 - Dec 2022

- Cooperated with project managers, designers, and Android leads to assess feature feasibility, prioritize, and optimize workflows.
- Provided leadership and mentorship to team members, guiding them in technical and professional growth while fostering a collaborative work environment.
- Performed code reviews, ensuring code quality, adherence to best practices, and maintainability across the team.
- Handled production issues, diagnosing and resolving bugs to ensure user satisfaction.

iOS Developer • Tectagon IT Consultant

Apr 2020 - Jun 2021

- Developed and maintained an online car repair shop application using programmatic UIKit, adhering to the MVC architecture, and integrating REST APIs and third-party libraries like Firebase and SwiftGen, managed via Carthage.
- Collaborated with peers and senior developers to address blockers, share insights, and refine solutions.
- Conducted quality assurance testing across various mobile devices to ensure screen adaptability, and backward compatibility.

Student Internship • Apple Developer Academy Indonesia

Apr 2019 - Jan 2020

- Developed innovative apps using Apple's technology and challenge-based learning framework, focusing on identifying, researching, and solving real-world problems.
- Co-founded Hearo App, an award-winning application leveraging sign language recognition to bridge communication between hearing-impaired and others. Featured as one of the top projects in the program and highlighted in Apple Newsroom.

Education

Bachelor Degree of Information System

Aug 2018 - Mar 2020

Faculty of Computer Science, Universitas Indonesia (UI)

GPA: 3.79

Diploma Degree of Electronics Engineering

Aug 2015 - May 2018

Department Electrical and Informatics Engineering, Vocational College, Universitas Gadjah Mada (UGM)

GPA: 3.64

Technical Skills

Programming Language: Swift, HTML, CSS, JavaScript, PHP, Go

Library & Frameworks: Programmatically UI, Snapkit, PromiseKit, SwiftUI, Cocoapods, Swift Package Manager, Realm, Laravel, Next.js, Tailwind CSS

Tools & Platform: Xcode, Git, Github, Firebase, Postman, DBeaver, Figma, ClickUp
